- 4 Innovative

# Our Services

A large cargo ship with a white superstructure and blue hull is sailing on the ocean. The ship is heavily loaded with shipping containers stacked high on its deck. The background shows a vast, slightly choppy sea under a sky filled with soft, warm-colored clouds, suggesting either sunrise or sunset.

We provide a full range of specialist logistics, stevedoring, on/offshore terminal operations, material and cargo handling, haulage and marine support services to the oil, gas, energy and industrial sectors:

# STEVEDORING

• • •

1

Dedicated personnel for port/terminal operations.

2

# THE SEA AND CLIMATE REGULATION

The sea plays a central role in maintaining the Earth's climate. It absorbs solar energy and redistributes it through global currents, regulating temperatures across continents. This heat exchange influences weather systems, from monsoons to hurricanes. The ocean also serves as a carbon sink, absorbing roughly 25% of human-caused CO<sub>2</sub> emissions.
